2. **Scope.** This CCPA Addendum only applies where, and to the extent that, Bynder processes Personal Information that is subject to the CCPA on behalf of Customer as a Service Provider in the course of providing the Product pursuant to the Agreement.
3. **Business Purpose.** Bynder shall only collect and process Personal Information as a Service Provider upon lawful documented instructions from Customer, including those in the Agreement, this CCPA Addendum, and Customer's configuration of the Product or as otherwise necessary to provide the Product specified in the Agreement (the "Business Purpose"). 4. **Bynder obligations**
  - 4.1. Customer is a Business and appoints Bynder as its Service Provider to Collect and process the Personal Information for the Business Purpose. Customer is responsible for compliance with its own obligations as a Business under CCPA and shall ensure that it has provided notice and has obtained (or shall obtain) all consents and rights necessary under the CCPA for Bynder to collect and process the Personal Information for the Business Purpose.

## **ANNEX A**

### **TECHNICAL AND ORGANISATIONAL MEASURES INCLUDING TECHNICAL AND ORGANISATIONAL MEASURES TO ENSURE THE SECURITY OF THE DATA**

***Description of the technical and organisational measures implemented by the data importer(s) (including any relevant certifications) to ensure an appropriate level of security, taking into account the nature, scope, context and purpose of the processing, and the risks for the rights and freedoms of natural persons.***

Data importer will implement and maintain the technical and organizational measures to adequately protect the data exporter's Personal Data as further described in the DPA. Data exporter understands and agrees that these technical and organizational measures are subject to technical progress and development and Bynder is therefore expressly allowed to implement adequate alternative measures as long as the general security level described in the DPA is maintained.

***For transfers to (Sub-) Processors, also describe the specific technical and organisational measures to be taken by the (sub-) processor to be able to provide assistance to the controller and, for transfers from a Processor to a Sub-Processor, to the data exporter.***

Bynder selects its Sub-Processors very carefully, all of which undergo stringent security assessments and intakes. Bynder has imposed on them data protection obligations that correspond to the data protection provisions in the contractual relationship between Customer and Bynder. Taking into account the state of the art, costs of implementation, and nature of the processing, our Sub-Processors shall maintain appropriate technical and organisational measures to protect Personal Data against accidental, unauthorised, or unlawful destruction, loss, alteration, disclosure, and access ("Security Measures"), including, as appropriate: (a) the pseudonymisation and encryption of Personal Data; (b) the ability to ensure the ongoing confidentiality, integrity, availability, and resilience of Processing systems; (c) the ability to restore the availability and access to Personal Data in a timely manner in the event of a physical or technical incident; and (d) the regular maintenance, testing, assessment, evaluation, and updating of the effectiveness of the Security Measures.
